

Medicor Project Goals

- A **standard search engine** (same look and feel for all participating libraries)
- Web-hosted, convenient **remote access**
- **Single sign-on** authentication for all resources
- Search multiple resources simultaneously (**multi-database, federated Searching**)
- Search native resource for expert searching
- Powerful user **personalization** features
- OpenURL linking (metadata) that retrieves full text information & **works effectively with library services**
- **Usage analysis** for decision making
- **Consortium-ready** (access to resources of multiple libraries based on hospital affiliation)
- **Free** to members of the Medical Society
